

Sahana Swaminathan

Software Engineer — Microsoft Corporation

(408) 398-9186 | sahana631@gmail.com | [linkedin.com/in/sahana533](https://www.linkedin.com/in/sahana533) | Seattle, WA

SUMMARY

Software Engineer with 3 years of experience building enterprise-scale systems and customer-facing applications. Experienced in JavaScript, TypeScript, and React on the frontend, and C# and Node.js on the backend. Shipped production features used by enterprise customers globally, owned operational quality through on-call incident response, and built AI-assisted workflows to improve engineering productivity at scale.

EDUCATION

B.S. in Computer Science, Data Science — Purdue University, Graduated 2023

Presidential Scholarship Recipient & Honors College Graduate

EXPERIENCE

Software Engineer

Microsoft Corporation — Redmond, WA Jun 2023 – Present

Dynamics 365 Omnichannel Voice Oct 2024 – Apr 2026

- Owned end-to-end delivery of Teams Phone extensibility features, deepening integration between Microsoft Teams and Dynamics 365 Contact Center for enterprise customers globally
- Delivered DTMF Broadcast feature — currently in public preview — enabling real-time tone broadcasting to all call participants, improving customer call center experiences at scale
- Maintained communication infrastructure at 99.999% reliability, obsessing over zero-interruption experiences for enterprise customers
- Led Sev-2 incident investigations and customer escalations on-call, independently coordinating cross-team response to diagnose and resolve service outages
- Built AI-powered workflows using Claude and GitHub Copilot to automate bug triage and incident investigation, improving engineering velocity across Omnichannel services

SRO Support — DevOps & Developer Productivity Jun 2023 – Oct 2024

- Developed static analysis packages in C# adopted across 1,000+ engineers, including a credential/secrets scanner to prevent accidental token exposure in the codebase
- Built Grafana dashboards tracking PR metrics and developer velocity, giving engineering leads real-time visibility into team productivity
- Maintained CI/CD pipelines using PowerShell and KQL to improve build reliability and unblock engineers on local environment issues

Software Engineering Intern

Microsoft Corporation — Redmond, WA Jun 2022 – Aug 2022

- Integrated Instagram messaging into Dynamics 365 Omnichannel CRM using the .NET framework in C# and the Instagram Messaging API

Software Engineering Intern

State Farm Insurance — Bloomington, IL May 2021 – Aug 2021

- Architected a full stack self-service tool using the MERN stack — built responsive React UI components and a Node.js backend — allowing engineers to view and manage their GitLab groups and projects
- Wrote automated test suites using JUnit and Enzyme to ensure reliability across the application

SKILLS

Languages: JavaScript, TypeScript, C#, Python, SQL, PowerShell, KQL, Java

Frameworks & Tools: React, Node.js, .NET, Grafana, Azure DevOps, GitHub Copilot, Claude

Platforms: Microsoft Azure, Dynamics 365, Microsoft Teams
